elpro.com

LIBERO ITS

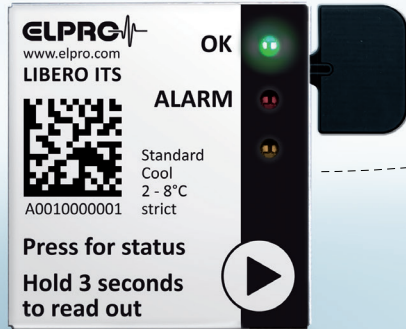

The easiest, most affordable indicator for continuous temperature monitoring and calculating stability budgets of pharmaceutical products or clinical studies along the entire supply chain.

Temperature monitoring on box-level:

- Monitors the stability budget
- Operating range -30°C to $+70^{\circ}\text{C}$
- 6 Alarm zones, configurable
- Run-time up to 4 years
- Thin and compact
- Low cost
- Wireless read-out of statistics

Easy and compliant read-out application via smartphone:

- Visibility to stability budget and statistics
- Option to add product specific information
- Secure PDF report and retrieval of calibration certificate

liberoMANAGER our database solution:

- Upload PDF report to the database
- Analytics and dashboards to identify logistics trends
- Automate your cold chain processes
